EDUCATION

Master of Science, Computer Science

Texas A&M University

Jan. 2022 – May. 2023

Texas, USA

Relevant Coursework: Design and Analysis of Algorithm, Advanced Software Engineering, Mobile Software Development, Machine Learning, Deep Learning.

Bachelor of Engineering, Computer Science

Jawaharlal Nehru Technological University

Aug. 2016 – Nov. 2020

Telangana, India

Relevant Coursework: Data Structures, Object-Oriented Programming with CPP and JAVA, Theory of Computation, Operating Systems, Database Management

RELEVANT EXPERIENCE

Data Engineer

CVS Health

Aug 2024 - July 2026

Dallas, Tx

- Designed and deployed scalable ETL pipelines on Amazon S3-based data lake, transforming multi-source healthcare data into a unified analytics layer that accelerated BI reporting and reduced time to insight for clinical and operational teams
- Designed star schema dimensional models for a healthcare analytics warehouse, structuring KPI data into a central encounters fact table and dimension tables (patient, provider, date, facility, diagnosis), reducing average query execution time by 50%
- Designed modular, reusable Amazon MWAA Airflow DAGs with task-level retries and dependency management, reducing DAG maintenance overhead by 35% and eliminating repetitive pipeline code across 15+ workflows
- Built incremental ingestion pipelines using watermark-based logic, significantly reducing reprocessing overhead and improving pipeline throughput for high-volume datasets
- Transformed the data by integrating it with Nielsen sales data to generate KPIs, leading to a 40% improvement in client stocking

Data Engineer

U.S Bank

July 2023 - Aug 2024

Dallas, TX

- Delivered production-grade PySpark ETL pipelines processing enterprise banking datasets on Databricks on AWS, achieving 30% reduction in downstream latency and enabling consistent, high-availability data for business-critical analytics
- Re-engineered Databricks Spark transformation logic, execution plans, and cluster compute utilization reducing pipeline runtime from 7.5 days to 18 hours (90% reduction), enabling near daily refresh for downstream financial analytics
- Utilized Auto Loader with schema evolution on Amazon S3, automating dynamic schema handling for continuously arriving files, eliminating manual schema changes and reducing ingestion failures across high-volume data pipelines
- Owned pipeline observability by implementing structured logging, alerting, and documentation, reducing mean time to resolution for production incidents from 4 hours to 45 minutes

Data Analyst

Texas A&M University

May 2022 - May 2023

USA

- Performed exploratory data analysis on research datasets, that directly influenced 3+ funded research projects
- Developed ETL scripts to automate data extraction from multiple sources reducing manual work by 30%
- Built interactive dashboards in Power BI to visualize trends in student performance, resource utilization

PROJECTS

AirBnB CDC Ingestion Pipeline | Python, Azure Data Factory, ADLS, CosmosDB, Azure Synapse, SQL

- Implemented a Change Data Capture pipeline to track and propagate incremental changes across source and target systems, eliminating full-load overhead and reducing pipeline processing time

E-commerce Customer Behavior & Sales Analytics Platform | PySpark, Databricks, AWS Glue, S3, Redshift, Airflow

- Implemented incremental extraction via AWS Glue to eliminate full dataset reloads for high volume retail transaction feeds
- Ingesting multi-source datasets using AWS Glue crawlers with automated schema discovery eliminating manual ingestion setup and ensuring schema consistency across all source layers.

NYC Taxi Data Engineering Pipeline | PySpark, Databricks, SQL

- Built an end to end data pipeline on Databricks for Taxi trip data handling raw CSV ingestion, cleaning, timestamp parsing
- Aggregated business metrics in Gold layer with partitioning and Z-ORDER optimization for performant analytics

TECHNICAL SKILLS

Languages: Python, Java, SQL

Big Data: PySpark, Spark, Databricks, Delta Lake, Auto Loader

Data Modeling: Star Schema, Dimensional Modeling, Medallion Architecture

Orchestration&Tools: Airflow,Git, Docker, Azure DevOps, Jupyter

Cloud: AWS (Glue, S3, Redshift)

Databricks Certified Data Engineer Associate
